

SOLAR POOL COVER LIMITED WARRANTY

SAFETY FIRST!

Be aware that this is not a safety cover and specific dangers apply. It is very important you read all safety advisories in regard to your Solar Cover before using it.

There is no need to register your product. You are automatically registered at the time of Solar Cover shipment.

CARE AND MAINTENANCE ADVISORIES THAT AFFECT YOUR WARRANTY:

It is important that you follow these instructions in order to assure that your warranty remains valid.

1. Always Protect the Cover While Swimming:

The cover MUST be protected from sunlight when it is removed from the pool to avoid permanent heat damage. If the cover is rolled-up on a reel, the included reflective storage sheet must be secured over it at all times with the supplied cords. If not stored on a reel, the best way to protect your cover is to place it in the shade or cover it with the supplied reflective storage sheet secured with the supplied cords. If a reel is not used and the cover must be removed manually, pull 3 or 4 feet of the cover off the pool and repeat in a fan fold manner (accordion fold style) until the entire cover is out of the pool and fold in half in the opposite direction to fit the reflective storage sheet (graphical instructions are included). Damage due to improper exposure of the cover to direct sunlight (when off the pool) will result in voiding the warranty. Do not store cover on the lawn as your lawn can be seriously damaged in a short period of time if the Solar Cover is left on top of it.

2. Care in Handling:

To prevent damage to the Solar Cover, the Cover should be carefully lifted over abrasive pool decks, coping or any sharp ragged surface. Warranty does not cover mechanical damage.

3. Avoid High Temperatures:

Water temperatures above 90° F may shorten the life of your Solar Cover. If spa or pool temperatures rise above 90° F the Solar Cover should be removed and stored as directed herein. WeatherBeater™ does not warranty the cover if used on spas and or pools in which temperatures exceed 90° F. The Solar Cover should not be stored in an area where temperatures might reach 120° F. Cover damage caused by exposing the cover to the sun or excessive heat while either on or off the pool or spa are not covered by the warranty.

4. Chemicals:

When using a Solar Cover, the need for chlorination will be significantly reduced. Not adjusting chlorination may damage your cover. Solar Covers must be removed in order to ensure that there is no damage caused by chemical usage when the pool is shock dosed (super chlorinated above 4 parts per million) or other chemical levels are adjusted above those levels recommended by pool chemical manufacturers. The level of chlorine should be monitored to make sure it does not exceed 4 parts per million (4ppm) before a Solar Cover is placed back on the pool. This may require that the cover remain stored off of the pool as directed herein for an extended period of time. DAMAGE CAUSED BY EXCESSIVE CHLORINE EXPOSURE IS EXCLUDED FROM THIS WARRANTY.

SOLAR COVER LIMITED WARRANTY COVERAGE

Your Solar Cover is warranted to be free from defects in material and workmanship under normal use in accordance with the Solar Cover Installation, Care and Maintenance instructions herein. Weather-Beater warrants to the Purchaser that, for applicable warranty coverage schedule period per the chart below, the Solar Cover Material shall (subject to the other provisions of this Warranty) be free from manufacturing defects, able to withstand normal swimming pool water treatment products and able to withstand normal weathering. "Normal swimming pool water treatment products" exclude any damage or defect resulting from exposure to harmful chemicals other than swimming pool water treatment products approved for sale within USA which have been dosed and maintained at levels within the relevant manufacturer's guidelines at all times. This warranty does not apply to damage to the cover resulting from accident, misuse or abuse of the product (including punctures, rips and tears and mechanical damage to bubbles) or alteration or modification of the product after purchase or chemical damage or damage caused by exposure to excessive heat or neglecting to protect the cover after removal from a pool or spa. Further, force majeure including, without limitation, acts of God, storms, earthquakes, floods, piercing hail, fire, tornadoes and animals are excluded from this warranty.

THIS WARRANTY IS IN LIEU OF ALL OTHER EXPRESS WARRANTIES TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW. IF WEATHER-BEATER ACCEPTS THAT THERE HAS BEEN A BREACH OF WARRANTY, IT WILL IN ITS SOLE AND ABSOLUTE DISCRETION AS YOUR EXCLUSIVE REMEDY REPLACE THE DEFECTIVE PRODUCTS AS PROVIDED UNDER THIS WARRANTY. THE MANUFACTURER WILL NOT BE LIABLE IN CONTRACT OR TORT FOR ANY DIRECT, CONSEQUENTIAL, SPECIAL OR INCIDENTAL LOSS, INJURY OR DAMAGE ARISING OUT OF THE USE, MISUSE OR INABILITY TO USE THIS PRODUCT. THIS WARRANTY IS NOT TRANSFERABLE BY THE ORIGINAL OWNER TO A SUBSEQUENT OWNER OF THE COVER.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may have additional rights, which vary from state to state. The purchaser shall pay for the following percent of the manufacturer's list price at the time of replacement and shall be responsible for any handling or shipment fee for replacement, including additional shipping charges for oversized covers.

Prorated Warranty Coverage Schedules

Note that the schedules below are for representational purposes. The coverage starts during the month the cover was actually purchased and the duration either 3 or 6 years as applicable thereafter

| 20 mil Guard Series Warranty Coverage Schedule By Monthly Percentage % | | | | | | | | | | | | |
|--|-----|-----|-------|-------|-----|-----|-----|-----|-----|-----|-----|-----|
